ComfortPro CHRONICLES

SPRING/SUMMER 2019

ComfortPro Cares 2018 Winner's Story

Once again Comfort Pro ran their Comfort Pro Cares program that provided a free heating unit and installation to a family in need.

This is the eighth year that the heating and air conditioning company, Comfort Pro Inc., has provided a free Lennox heating system to a deserving Berks County family through its holiday event, Comfort Pro Cares.

The cost of the new heating system, including accessory equipment and labor, is valued at more than \$6,200, Newpher said.

Newpher was one of the Comfort Pro officials who evaluated the Negrón home earlier this year.

Starting in October, churches, businesses and individuals were invited to nominate a family in need of a stable heating source. Nominees had to be Berks County residents, own their own home and have a nonfunctioning heating unit.

All applications were reviewed by a panel, with three finalists getting in-home evaluations by a Comfort Pro team.

Only one winner is chosen each year, Newpher said, and Negrón's situation was the most dire.

"A few of the nominees had heat, but were looking to upgrade," Newpher said. "Our program is to really help somebody who needs it."

While this is the eighth official Comfort Pro Cares event, the company has helped families with little or no heat to get the warmth they needed for years before the Christmas program began, Newpher said.

Year-round Comfort, GUARANTEED

We agree to provide **two Precision Inspections per year** to ensure a comfortable, energy efficient, and safer indoor environment.

Why Should I have my Heating and Air Conditioning System inspected each year?

It is important that you make sure your systems are mechanically sound and that the safety controls are functioning properly. Your air conditioning system should have an Airflow and Refrigerant Diagnostic Performance Test to make sure it is achieving maximum performance levels. Your heating system should also have Carbon Monoxide Analysis and Temperature Rise Performance Tests done. These maintenance items are all performed during your WatchDog Maintenance Plan Precision Inspections.

Does refrigerant need to be added to my system every year?

No. The refrigerant in your air conditioning system is circulated through the copper refrigeration lines to remove heat from your home. If your system ever needs refrigerant, you have a leak which means your system will not run at it's highest efficiency level. It can also damage the compressor, the heart of your air conditioning system.

Do you have Harmful Carbon Monoxide Levels in YOUR home?

Carbon Monoxide is responsible for an average of 430 unintentional deaths a year. During your WatchDog Fall Inspection, Comfort Pro will monitor the carbon monoxide levels in your heating system by performing a detailed analysis.

MEET THE COMFORT PRO TEAM

Dawn Eagle

"Thank you for calling Comfort Pro, this is Dawn how may help you?"

This is the friendly greeting Dawn Eagle, Comfort Pro Service Coordinator / Office Assistant says when you call, or visit Comfort Pro. Dawn has the pleasure to assist customers with all their service needs. Whether you need a service appointment for a faulty heating & air conditioning system, are scheduling routine maintenance, need a new Heating & air conditioning system or hot water heater, or want your air ducts or dryer vent cleaned, Dawn will make sure your needs are met!

Why did you choose to work for Comfort Pro?

A native of Berks County, Dawn heard of Comfort Pro prior to working there and even knew some employees. As soon as she learned of the job opening, she applied right away. "I am so happy to be a part of the Comfort Pro team. It is my second family," said Dawn.

What are some things you enjoy about doing your job each day?

One thing Dawn enjoys most about her job is talking to the customers. "It's like I am talking to my family," said Dawn.

What do you do when you are off the clock?

Dawn is the proud mother of Brody her 7-year-old son. Brody is an active boy who loves

playing games and spending time on his iPad. They live in Sinking Spring with their two cats, Ty and Lily.

What do you do in your free time?

When not spending time with Brody, you will find Dawn shopping. "I love to shop whether it be at a store or online. I love the thrill of getting a good deal," said Dawn.

What are five things you can't live without?

With her love of shopping, it is not a surprise three things she could not live without are her phone, Internet and credit cards. In addition to the items to help with the shopping, she added wine and family.

“
Comfort Pro thoroughly examined my heating & air conditioning system, inside and outside. They performed all required tests according to the WatchDog agreement. A thorough and efficiently done job by a knowledgeable and courteous technician. I'd highly recommend a WatchDog Maintenance Plan for your heating & air conditioning service.

- Thomas B.
